ART & PERCEPTION

The main objective of Art & Perception is to provide a high-quality platform to publish new artwork and research in the multi-disciplinary emerging bridge between art and perception. As such it aims to become the top venue to explore the links between the science of perception and the arts, and to bring together artists, researchers, scholars and students in a unified community that can cooperate, discuss and develop new scientific perspectives in this complex and intriguing new field.

The purpose is not to minimize or erase the differences between the arts and sciences, which are grounded in venerable histories that are in many ways necessarily distinct. Rather, the ambition of the journal is to combine the differing methods and insights of artists and scientists in order to expand our knowledge of art and perceptual experience in a way that neither could do alone.

Art & Perception will serve those across several areas of science studying the way works of art and design affect us perceptually, cognitively, or physiologically. The editors are also keen to receive submissions from practicing artists, and those in related fields of history and theory, which offer an artistic perspective on perception.
